

Premium timber systems

For building or renovating ask for A-align.
Do it once. Do it right.

The complete exterior building products system.

Engineered pine cladding, balustrading & fencing solutions that are simple, faster & proven.

Cladding. Balustrading. Fencing.

A-align Cladding

Available in three profiles:
Bevelback, Rusticated & Vertical.

A-align
Bevelback Cladding

The traditional weatherboard look, with each board overlapping the board below it. Available in two profile depths. 187mm x 18mm (Ex. 200 x 25) and 142mm x 18mm (Ex. 150 x 25). Available in Concealed Fix and Nail Fix.

A-align
Rusticated Cladding

Another traditional weatherboard look, scalloped at the top with a more flush wall profile. Available in two profile depths. 187mm x 18mm (Ex. 200 x 25) and 142mm x 18mm (Ex. 150 x 25). Available in Concealed Fix and Nail Fix.

A-align
Vertical Cladding

A new application of the traditional shiplap product applied vertically for a modern look. Available in two profile widths 187mm x 18mm (Ex. 200 x 25) and 142mm x 18mm (Ex. 150 x 25). Available in Nail Fix.

The Concealed Fix system has proven popular, with its precision machined, pre-cut components allowing builders to deliver traditional timber cladding to the highest standards more efficiently.

The unique patented fixing system combined with the A-align pre-cut components make installation 25% quicker than standard weatherboard cladding.

The innovative world-first Concealed Fix system locks weatherboards tightly in place without the use of nails, so the surface of the weatherboard is unbroken. Of particular value in a coastal environment. This means high moisture protection, no filling and puttying

of nail holes, superior face finish and quick installation. A-align is also available in Nail Fix. Precision cutting of all components means a tight fitting joinery-quality finish is still achieved with fewer nails.

With A-align Concealed and Nail Fix you can also choose your first final colour coat and have it applied and delivered direct from the factory. Ensuring better overall paint coverage and reducing final painting time once installed.

A-align Balustrading & Fencing

Classic. Elegant. Simple.
Crafted for enduring performance.

A-align
Balustrading

A-align doubled sided Balustrading uses the tried and true bevelback profile. Precision-machined solid timber components, treated and engineered for performance.

A-align
Fencing

A-align doubled sided Fencing uses precision-machined solid timber components, treated and engineered for performance. The fence is easily constructed with a user-friendly fixing system.

Tru-Pine
Posts, Beams & Boards

The Tru-Pine range is used in pergolas, decks, verandas, porches and balconies. Precision-machined solid timber components, treated and engineered for performance.

Tru-Pine
by claymark

A-align fencing – the easy way to create a double sided fence with excellent street appeal. Precision machined solid timber components with a user-friendly fixing system. Classic. Elegant. Simple. Crafted for enduring performance.

A-align timber

A-align is manufactured from kiln-dried, factory processed, treated and primed radiata pine sourced exclusively from New Zealand's sustainably-managed plantation forests.

Timber of uniform density and colour is selected and is finger-jointed for added strength. This improves the original physical and structural characteristics of radiata pine by over 400%. After each component has been precision-cut, it is treated for resistance to fungal rot, borer and termites. Two coats of premium oil-based primer and undercoating are then applied for superior weatherproofing.

All A-align timber components are manufactured on one site for quality control at every step to consistently deliver a premium product.

Easy to install to the highest standards. That's what builders like about A-align. It machines well, and the precise cutting of each component ensures a tight fit for weatherproof performance.

When cladding is completed, it's easy to achieve a high quality paint finish. Two coats of premium exterior acrylic paint is all that is required to complete the job. Alternatively, factory first final coating is now available on all A-align products. The homeowners colour choice can be applied in factory conditions so only one final coat is required on site, saving time, labour and ensuring a premium quality.

A-align for your home

Whether you're building your dream home, renovating or recladding an existing home, when you choose A-align timber weatherboards, you're choosing a cladding that has been proven for generations.

Timber weatherboard homes are part of our architectural history. Over 100 years after they were built, gracious timber villas still command high prices.

Claymark has been a part of the New Zealand building industry for many years. Over the

last decade, we've welcomed the renewed interest in traditional timber cladding. We've responded with our A-align cladding systems – engineered timber weatherboards and components. An innovative solution that has won praise from architects, builders and homeowners.

Treated to endure and precision-cut using the latest European timber manufacturing technology, A-align is easy to install to the highest traditional craft standards.

Why choose A-align?

Manufactured on one site, from raw timber to packaged product, for consistent premium quality.

Tried and true engineered timber refined into an exceptional contemporary weathertight cladding solution.

Treated, precision machined pre-cut components reduce on-site work to a minimum.

Easy and quick to install to the highest traditional craft standards for enduring performance.

Premium factory-applied **first final top coat** is available with all A-align products.

A BRANZ Appraised solution that meets relevant New Zealand and Australian building code requirements.

Created from **sustainable plantation forests** for minimal carbon footprint.

Premium factory-applied Dulux oil-based **primer and undercoating** provides a foundation for exceptional paint finish and durability.
